## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claims 21-38 drawn to compounds of general formula I and pharmaceutical compositions thereof. If Applicants choose this invention, they are further required to select single specific identities for each of the variables  $R_1$  -  $R_{16}$  (each, where applicable), A, U, X, Y and Z in the compound of general formula I. These should be selected from the variable definitions set forth in claim 21. Applicants are further required to specify the identity of any variable set forth in a dependent claim. Other compounds having different identities for any of the variable groups will be held withdrawn from consideration as being drawn to a non-elected invention

Group II, claim 39 drawn to a method of treating or preventing a tumor using a compound of general formula I. If Applicants choose this invention, they are further required to select single specific identities for each of the variables  $R_1$  -  $R_{16}$  (each, where applicable), A, U, X, Y and Z in the compound of general

formula I. These should be selected from the variable definitions set forth in claim 21. Applicants are further required to specify the identity of any variable set forth in a dependent claim. Methods employing other compounds having different identities for any of the variable groups will be held withdrawn from consideration as being drawn to a non-elected invention

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The only possible special technical feature shared by the claims is the structure of the compound of general formula I. The compounds of general formula I, however, do not have a common core which could be considered the basis of a special technical feature. For example the variable X may be N or CH. The selection of either identity produces a completely different set of compounds different from that produced by the choice of the other. There is, therefore, no common core necessary for a special technical feature and unity of invention is therefore lacking.

1. No telephone call was made to to request an oral election to the above restriction requirement due to the complexity of the requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be

traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

### ***Conclusion***

2. Claims 21-39 are pending. Claims 21-39 are restricted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul A. Zucker whose telephone number is 571-272-0650. The examiner can normally be reached on Monday-Friday 5:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Evonne Eyler can be reached on 571-272-0871. The fax phone number
